SUSTAINABILITY

Sustainability is an important topic in the world. At Royal Dutch LV Logistics, we have embedded it as a key priority in our strategy.

We will focus on 4 SDG's (sustainable development goals) of the United Nations. They will allow us to make the most impact.

» **Company**

We try to keep our CO₂ footprint as small as possible in our daily operations. For example, by using electric vehicles, solar energy and the digitisation of processes.

» **Employee**

We invest in a sustainable workforce, including by focusing on vitality and health.

» **Client**

We help our customers to investigate how they can further green the transport in their supply chain.

» **Planet**

We see the possibilities of playing a prominent and active role in the whole greening of the energy sector, because we have a great deal of knowledge and experience in large-scale energy projects.

SPONSORSHIPS

At LV Logistics, we value vitality, health and sportsmanship. And of course, we want to promote our brand name in a professional and appropriate way.

For this reason we are also active as a sponsor. In addition to a number of social projects, we have a major partnership with the following two parties.

» **Team DSM**

Professional cycling team, active and visible in all major classics and tours around the world. As part of this partnership we also support 'Trees for All', a foundation that plants trees around the world to compensate for CO₂ emissions.

» **Middlesbrough FC**

Traditional football club, in season 22/23 playing in The Championship, one class below the Premier League. The stadium is located next to our LV Middlesbrough office in the UK.

“WE KNOW OUR CUSTOMERS.
WE FIND **PERSONAL CONTACT**
IMPORTANT AND KEEP
